

### • Why SIRENA?

**SIRENA** is not just another vacuum cleaner. The water-based filtration system makes **SIRENA** a fundamentally superior total home cleaning system, to clean your home in ways that traditional vacuums cannot.

**SIRENA** has a quiet mode to remove dust and odors from your home. Use fragrances to transform **SIRENA** into an air freshener, or Ocean Breeze deodorizer to eliminate odors. Add eucalyptus oil, your **SIRENA** becomes a vaporizer!

### • Bags and Filters Do Not Work

When dirt and dust pass through a bag or filter, it clogs the holes that allow air to flow through them.

Less airflow means less cleaning ability. Vacuums that use bags and filters lose efficiency with each use.

Bacteria and germs grow in dark, warm, filthy places. Your current vacuum sends these bacteria and germs into the air you breathe. This is especially bad for people who suffer from allergies or asthma.

AVERAGE BAGS  
COST \$360  
OVER 5 YEARS

### • Suction vs Airflow

Vacuum companies boast about their suction, but does suction clean? The answer is **NO**. Cleaning ability comes from **airflow**, not suction.

Example: you are vacuuming and you notice a piece of lint. You go over it, but it stays on the carpet. You check: you have suction, but no airflow. You pick up the lint, throw it into the hose and continue to vacuum.

If your vacuum cannot pick up a piece of lint, it is not picking up dirt either. The bag would be heavier if it were actually getting the sand and dirt out. Have you seen the dirt left under your carpet? You must have **AIRFLOW** to clean efficiently.

### • Bagless Systems Do Not Work

Systems with collection bins still rely on filters to catch particles of dust and dirt that escape from the bin. These clog just like any other bag or filter. Less airflow means less cleaning ability.

Filters have to be replaced regularly, and still send germs, bacteria and dust back into the air you breathe. Sufferers of breathing disorders are especially vulnerable.

AVERAGE FILTERS  
COST \$500  
OVER 5 YEARS

**PREMIUM ELECTRIC HOSE WITH TRIGGER HANDLE**  
Will not kink or break

**TELESCOPIC WANDS**  
Space saving storage

**POWER NOZZLE**  
low profile with adjustable height for all carpet types

**3.5L WATER BASIN**  
Large capacity
